Delhighlights is the official publication of the Delhigh Power Squadron, a unit of United States Power Squadrons®, **District 5**, and is published bi-monthly.

Editors: Lt Michele Lamboy, P
Cdr Kathleen Nowroozani, SN

Most squadron meetings are held monthly at :

Star of Bethlehem Lutheran Church
514 3rd Avenue
Bethlehem, PA 18018

Delhigh website:
www.BoatingLehighValley.com
D/5 website: www.uspsd5.org

Commander's Corner
Cdr Kathleen Nowroozani, SN

I was recently contacted by a gentleman named Walt that is with the Sea Scouts and is looking to start a feeder program of middle school aged students to generate interest in the Sea Scouts. At this point the whole thing is just a concept, but to get it off the ground he needs help from groups such as ours. He is looking for help with teaching and events that he believes we can provide. He has spoken with Peter's Marine and the local USCG Auxiliary as well. He will be at our upcoming April meeting to discuss ideas and give us a summary of what he is hoping to accomplish and how that would work. Please plan to attend the meeting. He will also be attending the district spring conference with some of his peers from other areas within our district, feel free to stop by his booth if you are there.

We are still in need of a committee to update the bylaws. I am happy to chair as I have done this before, I just need a few other members with time to get together and decide which changes will benefit our squadron and which ones we are not in need of. There is an updated squadron bylaws template from National that we can use. Please volunteer if you have the time to get together and work on this with us.

As you can see from the pages in this issue, it is finally Spring and we will be having more outdoor events. Please remember to RSVP so that the host can prepare for all of us. I hope to see you all at an event soon.

NOTE: The private, upgraded buffet will be served rain or shine and includes the usual burgers, dogs and sides and more, plus water and soft drinks. If the game is cancelled the buffet WILL STILL BE SERVED. We will meet regardless of the weather! **We have our own buffet and a roof over our heads so we will stay dry rain or shine!**

Please contact P/C Kathleen Nowroozani, SN at (610) 351-5192 or k.now@mac.com if you would like to make a reservation to attend. Payment is required NO LATER THAN **June 30, 2023.**

Friends and Family are Welcome!

Let's Play Ball!!!

Become a Better Boater, Take an In-Person Boating Course with

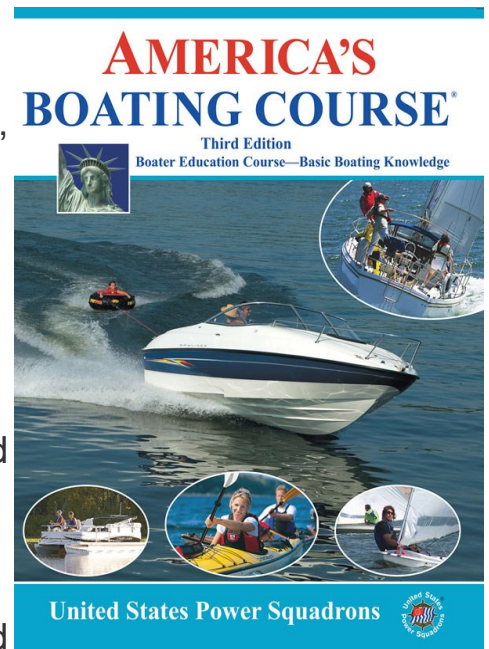

Taking a boating class reduces your risk of accidents and injuries, saves you money on boat insurance and qualifies you to test for your state boating license.

America's Boating Course is the most comprehensive, single source, in-person boating course available to give you the skills you need to enjoy your time on the water and boat with confidence. Our boater safety class meets the certification requirements for a Pennsylvania boat license.

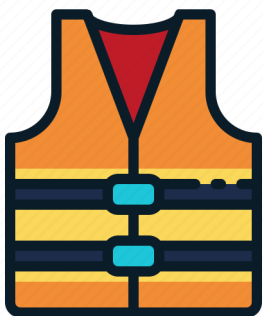

What You'll Learn:

- Information about Pennsylvania State Boating Laws, regulations, boat registration, and licensing
- Required boating safety equipment
- Do's and Don'ts of boating safely
- Practical Knowledge of navigation and rules of the road
- How to handle medical emergencies onboard and mechanical problems on the water
- The basics of towing and trailering
- Special, important information for hunters, anglers, and sports enthusiasts.

For the best, most comprehensive boating education available, take America's Boating Course with our certified expert instructors.

Cost of the Class is \$50 per person with book

For more information or to register for the course contact Sergio at slamboy3@gmail.com

VSC Corner

By: P/C Keith Knoblach, AP

With the mild winter we have had, boaters are beginning to get anxious to get their boats ready for another season to be on the water. As you ponder this, make a list of things you need to do and get the supplies and parts necessary for a good and safe time this year.

Check your hoses and connections for cracks, leaks and hardening, such as fuel, water and air intakes. Blower motors that are not running at proper speed means not enough air flow, putting strain on electrical systems, which can overheat and cause fire. The bilge should be cleaned, and the pump checked, with all debris cleaned from around it. The exit hose should be completely open. If your boat is equipped with a fire suppression system, check that it is charged and outlets are open.

Check your steering to be sure it is free and turns properly in both directions. Outboard motors need to be greased at all fittings with the correct grease for durability and ecological protection. Check the throttle cables for wear and worn-out casings. Electrical systems should be checked for loose connections, frayed insulation and broken wires.

Tune up your motors, including spark plugs and wires; adding fresh oil if needed. Be sure to have spare parts for emergencies. Only use marine parts made for boats. Inspect the prop for damaged flutes, which cause vibrations and excess wear on all the drive components.

These are only a few things necessary, but as you think about what you need to do, more will surely be added to your checklist. Write your list and check off the items as you go. This is one of the best ways to have an enjoyable season boating. Get your Vessel Safety Checks done. We can do them at Beltzville Lake during our clean up, or when/where it is convenient for you. Contact a Vessel Check Examiners to set up an appointment.

Let's have a great time this year. Be safe and aware of all others around you. Hope to see you on the water this year.

Executive Officer's Report

Our America's Boating Club Lehigh Valley Delhigh Power Squadron just had our 2023 Change of Watch Saturday March 4. A more formal affair for us, we have enjoyed wearing our uniforms to show the importance and sense of purpose we bring through continuing boating education and social events we share with the boating community, our members, friends of the squadron, and the general public.

I once again am honored to be on the Bridge, and look forward to be working with fine Bridge Officers, members and friends for another term.

Don't forget our District 5 Spring Conference and Change of Watch will be held March 30 - April 2, 2023, at the Princess Royale Hotel in Ocean City, Maryland. By the time you read this, it will be over. However, look for conversations of topics and important discussions on various items at the conference through your squadrons, district representatives, and online.

A major event I look forward to every year in the summer, is our squadron Chesapeake Bay Rendezvous.

Being held Thursday June 22 - Sunday June 25, 2023, at Haven Harbor Marina, and the Mariner Motel, Rock Hall Landing, in Rock Hall, Maryland.

Our schedule of events and details will be found in this issue.

Please attend if you can, this is one of our premier events of the year.

To the Breezes

Administrative Officer's Report

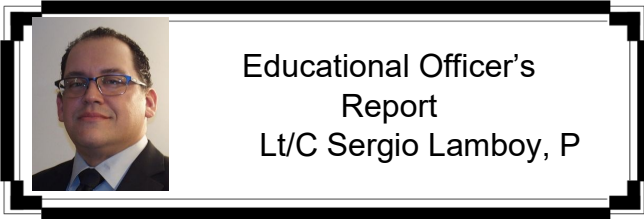

Spring is here and so are many of our favorite outdoor activities! The April Meeting is an Old Favorites Potluck, and we will have our guest from the Sea Scouts in attendance. At the end of April, we will be at Eight Oaks Farm Distillery for drinks and small bites. I have heard good things about this place and am excited to check it out. We cannot make reservations so please RSVP so we can make sure to find a large enough area when we arrive. You can find the menu at <https://eighthoaksdistillery.com/friday-saturday-menu-image>. They also have local wine and beer as well. There are tables and chair, but I suggest throwing a few chairs in the trunk just in case we need them.

The May Meeting is back (by popular demand) at Morgan's Local Flavor and the Sock Burning will be at Nikki's new place where she had our cookout last Fall. The Beltzville Lake Clean Up will be the first week of National Safe Boating Week so bring your boat or ride on another's boat and help us keep our local lake clean. Then join us at Joey B's for what is always a delicious meal.

The Ice Cream Social is back at the Montuori's. Come on out for hot dogs, macaroni and cheese, and all the ice cream you can eat! Don't forget to bring a pint of your favorite ice cream to share.

This year's Summer Rendezvous will be a weekend of fun and friends! The hotel is a mile from the marina which will be a welcomed change from last year. I am excited to have all of us together again!

Educational Officer's
Report
Lt/C Sergio Lamboy, P

I'm sitting here writing this article, trying to think of what to say and it hit me! Actually, Michele hit me - reminding me that my articles are a little long and I should have no problem coming up with something. A handful of us are preparing to leave for the spring conference at the end of the month. I'm always hopeful to learn something new at the seminars and to see people I know and catch up with them. These occasional District 5 gatherings are always rewarding. This preparation got me thinking about warmer days and the fun to be had on the water. As always when fun is on the agenda, preparation, hard work, and elbow grease is not far behind. With this in mind, the opportunity for skinned elbows, knees, or bumps and bruises are most assured. Some of you, like myself, take on a few DIY projects on your boats and the February edition of the *Boating Compass* magazine has an article about how to go about these projects safely, called [Safety Tips for DIY Boat Repair](#).

At this time, we are in the middle of another ABC3 Boaters Safety Class at Peter's Marine in Allentown. Unlike our January class, the turnout is much improved. We always plan for 20 or so students, but things like weather and life in general get in the way. Hopefully, the students that missed out in January will realize the folly in their ways and attend in the future. The class at Peter's Marine gives the students the opportunity to ask questions and learn from the massive amount of combined experience our instructors have. This, in my opinion, can never be replaced by online offerings. Though the information and instruction is there, the personal touch is not. That being said, I will step down from my soap box and tell you this: our organization puts in a ton of thought, care, and planning to create the online courses that are available to all of us. Courses like [Boat Handling](#). This on-demand course continues to get positive reviews and is extremely informative. The use of videos and different imagery to convey the information that needs to be learned is second to none. If you know someone in need of any of the courses that America's Boating Club offers, please direct them <http://americasboatingclub.org> so they can see what's available and enjoy this life on the water we so love.

America's Boating Channel Urges Use of Engine Cut-Off Devices

Are you aware of the legal requirement for using engine cut-off devices? This is a requirement that could save your life.

The requirement to use an engine cut-off switch (ECOS) took effect on April 1, 2021, and applies to all U.S. waterways, with fines of \$100, \$250, and \$500 for the first, second, and third offenses, respectively. State and local authorities may choose to enforce the law differently, but using an engine cut-off switch is now the law for qualified vessels everywhere in the United States.

The law applies to all personal watercraft and recreational boats under 26 feet with motors capable of 115 pounds of static thrust (a little under 3 horsepower). Boats not currently equipped with an engine cut-off switch are exempt, but that grandfather clause is closing fast. Another recent federal law required manufacturers to install engine cut-off switches on all new boats starting in January 2020.

Videos are available that offer an overview of the importance of specialized safety equipment for recreational boating that will shut down the engine in an emergency such as the boat operator falling overboard. America's Boating Channel™ produced these videos to help viewers learn about traditional lanyard type devices, as well as the new wireless systems.

Watching videos like "[Engine Cut-Off Devices](https://youtu.be/3J3M8dMzqTk)" (<https://youtu.be/3J3M8dMzqTk>) is an excellent way for boaters to prepare for safer experiences on the water. America's Boating Channel also produced a sequel entitled "[Wear an ECOS](https://youtu.be/i0Nu7Gu-JG0)" (<https://youtu.be/i0Nu7Gu-JG0>).

It covers differences between boating knowledge and boating skills and why it matters. Viewers learn approaches to take to improve their boating abilities.

You can follow the above links or visit <https://www.youtube.com/@AmericasBoatingChannel>

to find these and other safe boating videos, which are an excellent tool to help recruit participants to our educational program and to membership. Invite your friends and neighbors to watch, like and subscribe to America's Boating Channel to introduce them to what our organization has to offer.

Available on YouTube, America's Boating Channel offers quick and easy access to professionally produced high-definition safe boating and boater education videos. [America's Boating Channel™](#) is produced by the United States Power Squadrons® (USPS) under a grant from the Sport Fish Restoration and Boating Trust Fund administered by the U.S. Coast Guard.

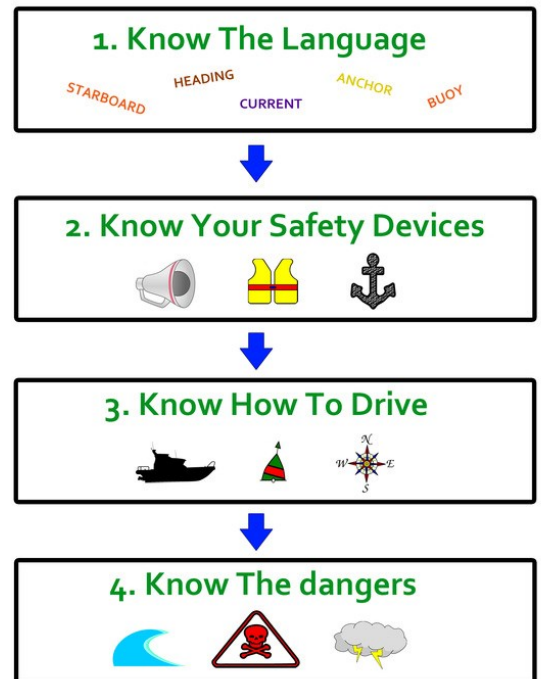

Boating Safely

4 Steps To Safe Boating

Are you aware of the legal requirement for using an engine cut-off switch (ECOS)? This is a requirement that could save your life. For an overview of the importance of specialized safety equipment for recreational boating that will shut down the engine in an emergency, such as the boat operator falling overboard, take time to view a video on the subject. America's Boating Channel™ has produced two videos to help viewers learn about traditional lanyard type devices, as well as the new wireless systems. View "Engine Cut-Off Devices" and "Wear an ECOS" at <https://www.youtube.com/@AmericasBoatingChannel>.

These and other safe boating videos are an excellent tool to help recruit participants to our educational program and to membership. Invite your friends and neighbors to watch, like and subscribe to [America's Boating Channel on YouTube](#) as a fun and educational introduction to what our organization has to offer.

Is there such thing as a bad day boating? Most days we would all agree that no, there is not a bad day out on our boats, but this guy would have rather been at work than have the day he did. Find out why here: [Is There Such a Thing as a Bad Day of Boating? |](#)

ABC Lehigh Valley's 'Loopers'

By P/Lt/C Doug McKenzie, JN

Delhigh Power Squadron

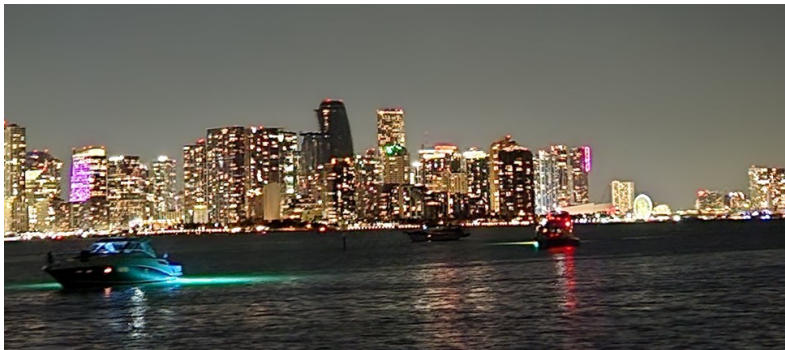

Greetings from the crew of Sea Stories! In the last Delhighlights we told you we bought a new home in Port St Lucie. We've been busy making it "our home" and we've also found time for some shorter cruises. Our time in Pompano Beach, FL ended at the end of February, and our summer home for the boat will be in Fort Pierce.

Closing day on our new home

Dave and Nancy Bernard from Absecon Power Squadron came to visit after the National COW in Orlando. The timing was perfect as we had to move the boat, so they joined us for the ride. We left Pompano Beach and headed out the Hillsboro Inlet heading south. We went inland at Port Everglades Inlet and continued

south down the ICW into Biscayne Bay. We had perfect weather for the trip and our first stop was an anchorage called Miami Marine Stadium. This was a fun place, with lots of the craziness you'd expect in Miami! The next day we anchored out in No Name Harbor; a beautiful anchorage and much quieter. We spent two nights there before we started

Miami skyline from our anchorage spot

up the ICW heading for Fort Pierce.

We stopped in at the Seagate Yacht Club in Delray Beach and spent two days there. One thing I love about boating is you are seldom in a hurry. It is a nice town with lots of things to do within walking distance of the boat. I had some of the best fish & chips I've had in a long time!

We finally made it to Fort Pierce and got Sea Stories all tied up in her new home. Fort Pierce is a nice town with lots of places within walking distance. Nancy's family used to go there so she enjoyed some memories. We spent two days there before heading back to Port St Lucie. After 1 ½ weeks, we said good-bye to the Bernards and got back to work in our new house. I love that there are so many great cruising areas around here, we'll always find time to explore some place new!

Sea Stories at anchor

A BIT OF FUN

Did You Know?

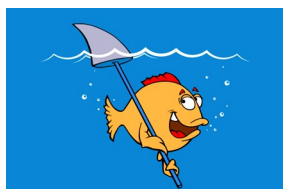

The New Zealand Maritime Museum in Auckland, NZ is where you can find stories of people and the sea. They offer Educational programs for kids and adults on sea preservation, shipwrecks and safety, immigration, and the maritime city of Auckland.

The website is full of peeks into exhibitions on everything boating you can imagine as well as a blog with many entertaining stories, including this one about cats on boats called: [Ship's Cats - Unlikely Heroes](http://maritimemuseum.co.nz) (maritimemuseum.co.nz)

"What do you say we stay here for the next 10 years, and tell our bosses that we were shipwrecked on a deserted island?"

HaHaHa

The boat used as the S.S. Minnow in Gilligan's Isle was a 1964 Wheeler with a cruising speed of 12 knots- which means they couldn't have traveled more than 41.5 miles. Now I'm starting to doubt if the show was even real.
